

Rotobo Sub

Rotating Integral Bow Centralizer

Best Product on market for use in rotating liner hangers.

Should be used when rotating casing string is necessary to get it to the bottom of the hole.

Utilize CaseTech's **Rotobo Sub** tool for maximum centralization and well bore stabilization, as part of your cementing process.

- ❖ Use where rotation is needed
- ❖ Bi-Center Capabilities
- ❖ Insure Positive Standoff
- ❖ Maximum Flow
- ❖ Maximum Well Bore Stabilization
- ❖ Integral to Casing Strings

This product is manufactured from heat treated material, with physical characteristics to meet or exceed the tensile and yield strength of the casing and fully documented.
